PROFESSIONAL PROFILE

Cybersecurity and DevSecOps professional with 11+ years of experience spanning application security, vulnerability assessment and penetration testing, security training, and release engineering. Work with development teams to investigate exploitable weaknesses, guide remediation, and integrate security checks into build and deployment workflows. Hands-on experience with GitHub, SAST integration, Python and Bash scripting, and web and API security testing.

CORE EXPERTISE

Application security • VAPT • Web and API security • SAST and DAST • CI/CD and release pipelines • GitHub • Burp Suite and Kali Linux • Python and Bash • Security training • Vulnerability remediation

PROFESSIONAL EXPERIENCE

Senior Manager, DevOps | HCL Technologies | Sep 2024 – Present

- Create and automate build and deployment workflows for internally developed Python, .NET, and Node.js applications, including React and Angular front ends.
- Use GitHub and Microsoft TFS to manage production release pipelines and integrate static application security testing into the delivery process.
- Manage infrastructure servers and provide development teams with controlled access to execute pipelines.

Senior Manager, Internal Application Security | HCL Technologies | Jul 2021 – Aug 2024

- Worked with development teams to remediate vulnerabilities in a Java application and reviewed fixes for security findings.
- Conducted Automated Dynamic Application Security Testing on in-house developed applications.
- Maintaining a dashboard of scan performed for the requested applications with vulnerabilities count, quarterly.

Manager, Application Security | Concentrix Daksh | Dec 2019 – Jun 2021

- Conducted application security reviews before release and full scale vulnerability assessments and penetration tests for Concentrix and its interests.
- Assessed applications from the perspective of a rogue employee and identified a data leakage path.
- Reported weaknesses involving ineffective IP allowlisting, API rate limiting, and internal networks exposed without authentication.
- Supported threat hunting and threat intelligence activities.

Cyber Security Specialist | Agile Cockpit | May 2018 – Dec 2019

- Tested servers, applications, networks, and perimeter security, including Azure cloud vulnerability assessments.
- Coordinated security work with development teams.
- Delivered internal cybersecurity training for employees and development teams.

Assistant Manager | Securitas India | Jun 2017 – Dec 2017

- Performed internal audits and security testing across servers, networks, perimeter systems, and applications.
- Managed departmental IT infrastructure and designed training for new joiners and developers.

Senior Analyst | Orion Secure | Feb 2016 – May 2017

- Conducted VAPT, web and smartphone application security assessments, and server, network, and perimeter testing.
- Supported ISO 27001 audits, risk analysis, and threat management.

Data Analyst | GlobalLogic | Mar 2014 – Jan 2016

- Performed manual and automated testing and developed scripts to automate Google Sheets workflows.
- Received two awards for exceptional work.

Executive and Trainer | Appin Technology | Dec 2012 – 2013

- Supported cybersecurity architecture setup, desktop security, and threat mitigation.
- Delivered ASP.NET and PHP training; completed a cybersecurity internship.

EDUCATION

BCA and MCA | Lovely Professional University | May 2012

Major: Information Security • Minor: Java
